Index to the 1985 Southern Journal of Applied Forestry

Titles of articles, department features, and letters appear in *italic*. The number on the right of the column represents the page on which the appropriate article begins.

Aerial application, herbicides 20
Air drying, effect on loblolly pine seedlings 125
Amateis, R. L. 84, 166
Anderson, L. M. 162
Arner, D. H. 137, 141
Ash, in swamp 52
Axle loads, on trucks hauling tree-length logs 157
Bahiagrass, Pensacola 254
Bailey, R. L. 134
Baldcypress, tree-volume and stem-profile functions for 227
Ballard, R. R. 44
Balmer, W. E. 69
Banded weed control, loblolly pine 11
Beaver 137, 141
Beaver damage to nonimpounded timber in Mississippi 137
Beck, D. E. 191
Bedding, effect on soil compaction 44
Behrns, G. T. 95
Bidding strategies, timber sales 6
Billings, R. F. 66
Bonyata, R. J. 254
Bosch, L. 76
Boyer, J. N. 76
Boyer, W. D. 114
Brendemuehl, R. H. 62
Broadcast weed control, loblolly pine 11
Brosing, deer, impact on pine seedlings 20
Bullock, J. F. 137
Burger, J. A. 150
Burkhart, H. E. 84, 166
Butt rot, sweetgum 26
Campbell, T. E. 99,205
Cao, Q. V. 227
CEPA in liquid sulfuric acid increases oleoresin yields 170
Chapman, W. 243
Choctawhachee sand pine 62
Clearcutting:effect on soil properties and pine growth 40
effect on early establishment of pine species in swamp 52
Clearcutting not enough for early establishment of desirable species in Santee River Swamp 52
Cloeren, D. C. 84
Competition control, loblolly pine sites 11
Computer applications, Schnur's site-index curves 3
Computerized inventory-monitoring of pine seed orchards 173
Container-grown oak seedlings 95
Cordell, H. K. 162
Cox, G. S. 95
Crop tree quality in young Piedmont oak stands of sprout origin 15
Cubbage, F. W. 217
DeBarr, G. L.
Decay following thinning of sweetgum sprout clumps: 26-year results 26
Deer browsing, impact on pine seedlings 20
Della-Bianca, L. 191
de Steiguer, J. E. 186
Determining the initial annual payment for long-term timberland lease 250
Development of direct-seeded and planted loblolly and slash pines through age 20 250
Disking to restore soil bulk density 44
Dixon, R. K. 95
Double-vs. single-row pine plantations for wood and forage production 55
Drum-chopping reduces root growth 44
Dukes, J. H., Jr. 11
Economic aspects of the forest regeneration delay decision 91
Economics of timber sale decisions 146
Ectomycorrhizae on container-grown oak seedlings 95
Effects of air drying on survival height, and root growth potential of loblolly pine seedlings 125
Establishment and growth of slash pine on grazed cutover range in central Louisiana 232
Evaluating landowner assistance programs and other wood procurement options 186
Even a country boy. . . 134
Farrar, R. M., Jr. 3
Feller bunchers: Franklin 105, 110
impact on plantation mining 117
Feret, P. P. 125, 173
Fertilization of slash pine progenies 37
Flick, W. A. 146
Forage production 55, 254
Forest management assistance and leasing, industrial 217
Foster, B. B. 196
Four-year growth and development of planted loblolly pine on sites with competition control 11
Franklin, E. C. 186
Franklin 105 feller buncher: fifth-row thinning application 110
Fusiform rust, in slash pine progenies 37
Gansel, C. R. 29
Garrett, H. E. 95
Gent, J. A., Jr. 44
Germination, speed of loblolly 240
Gjerstad, D. H. 11, 236
Glover, G. R. 11
Greene, W. D. 154
Grelen, H. E. 232
Gresham, C. A. 52
Growth and yield of planted loblolly and shortleaf pines in a north Mississippi creek bottom 247
Growth of Choctawhatchee sand pine plantation in Georgia 62
Growth of loblolly pine treated with hexazinone, sulfometuron methyl, and metsulfuron methyl for herbaceous weed control 20
Growth of 20-year-old Virginia pine planted at three spacings in Tennessee 32
Guide to using snares for beaver capture, A 141
Haney, H. L., Jr. 201
Hardwood topkill by herbicides injected at wide spacings 99
Hardwoods: competition 81; overtopping longleaf pine 114; tree species trial on strip-mine site 150; selection management 191
Hartley, J. J. 141
Harvesting: whole-tree 81; in young plantations 120
Herbicides: for weed control in loblolly pine 11, 20; injection 99; for kudzu eradication 128; preharvest use improves hardwood regeneration 177; use on long leaf pine seedlings 236
Hexazinone 20
High-gum-yielding slash pine: performance to age 30 29
Hodges, J. D. 222
Hodges, J. F. 37
Honduras pine spacing trial results in Puerto Rico 69
Hotvedt, J. E. 91, 227
Hutto, C. J. 15
Impact of feller bunchers and plantation spacing on thinning 117
Impact of intensive forest management practices on tree bulk density of lower Coastal Plain and Piedmont soils 44
Industrial forest management assistance and leasing: 1983 programs and accomplishments in Georgia 217
Influence of professional foresters on pine regeneration in the South 48
Insecticide applications during pollination period do not adversely affect seed yields of loblolly pine 240

Wood production 55
Yield relationships in unthinned loblolly pine plantations on cutover site-prepared lands 84
Zahner, R. 15
Zutter, B. R. 11, 236

You have to go a long way to save a tree in your own backyard.

Each year up to 50 million acres of tropical forest vanish. A loss of trees that is affecting Earth's environment. Even the trees in your own backyard.

If you have a forestry degree or forestry experience, Peace Corps will train you for a unique opportunity to help make a difference on a problem of global importance.

Working at a professional level that ordinarily might take years of apprenticeship back home, volunteers find the career growth they're looking for and a unique experience in the developing world.

It's only one of many projects open to volunteers in today's Peace Corps. Whatever your degree or field of experience, call Peace Corps toll-free, 800-424-8580. And put your experience to work where it can do a world of good.

U.S. Peace Corps.
The toughest job you'll ever love.
